Marseille 12

GCI's **Marseille 12** clay roof tile pays homage to this ancient French city. Known for hundreds of years as Massalia, it was the site of an important trading port of the ancient world.

This French inspired clay roof tile design dates back to the 1800s when it was patented alongside the first industrial clay presses. The Marseille clay roof tile possesses a timeless look that complements both traditional and contemporary architecture.

Technical Specifications

Overall Dimension	Unit Weight	Min Roof Pitch	Batten Spacing	Coverage
440mm x 270mm	≈4.1kg	20°	375mm (-60mm)	11.9 pieces/m ²
